

PUBLIC SERVICE ANNOUNCEMENT
October 17, 2024

Algoma Steel's Community Open House

Algoma Steel invites members of the public to their Community Open House:

Wednesday, October 23, 2024

4:00 PM – 7:00 PM

Marconi Cultural Event Centre

450 Albert St W, Sault Ste. Marie

Construction of an Electric Arc Furnace (EAF) steelmaking facility is well underway at Algoma Steel. This generational investment will transform the way we make steel, transitioning from the traditional integrated basic oxygen steelmaking route to the more sustainable electric arc steelmaking method. This change is expected to reduce Algoma's greenhouse gas emissions by up to 70%, positioning Algoma Steel as a producer of Green Canadian Steel.

Join us for an informative session where members of the Algoma Steel team will be available to share updates and discuss our ongoing transformation and modernization initiatives, including:

- Electric Arc Furnace (EAF) Construction Update
- Algoma's ESG Report
- Plate Mill Modernization
- Site Greening
- Community Air Monitoring
- Community Engagement

For more information, visit <https://algoma.com/environment/environmental-community/>.
Community Open House exhibits will be posted to the website on October 24, 2024.
